

## Motivation Letter

### **Position : YEMD Section Co-Chair**

As a young emergency medicine resident looking to be a professional emergency medicine physician to provide the best emergency care and to share his passion for this specialty with others and as one who got inspired by many leaders in this field who are very generous to share ideas and their experiences with everyone.

Since I started my training I have seen how emergency medicine is changing not only in Europe but everywhere especially after the COVID pandemic in the last year and see the important role of emergency medicine with the other specialties during this crisis to help our patients inside and outside the emergency department.

as a young emergency medicine resident having a dream to share knowledge and teach emergency medicine and transmit the passion of practicing emergency medicine.

This year I Would like to join all the dreamers who are looking to improve emergency medicine and have the opportunity to reach all the young Dreamers who want to be professional emergency medicine physicians.

I would like to begin part of group of people like the Young Emergency Medicine Doctors's section who share a passion for improving the practice of emergency medicine with people from different backgrounds, with different perspectives, come together across organizations and across hierarchies to meet as equals to create new knowledge and to inspire the future leaders of emergency medicine.
