

Dear all,

With this letter I want to express my continued interest to support our strong and growing initiative to bring together all those involved in the emergency (department) management of children. We are now -under the umbrella of EUSEM- a society in its own right and this needs enthusiastic people to steer the ship towards new horizons. While i would strongly support younger colleagues to take the lead, I would be happy to continue support and advice the board where needed as treasurer, a role I have been also doing in the past years.

This also allows me to continue being the link between EUSEP and the IFEM paediatric special interest group PEMSIG. A role I am very happy to take upon me. Collaboration is key to our profession and the collaboration with IFEM PEMSIG is one where both organisations profit from.

All best,

Patrick
