

The background is a dark blue field filled with intricate, colorful geometric patterns. These patterns include various shapes like triangles, squares, and hexagons, some with internal designs, and others that resemble stylized sunbursts or snowflakes. A white crescent moon is positioned in the upper right quadrant. The overall aesthetic is reminiscent of traditional folk art or tribal motifs.

11th INTERNATIONAL CONGRESS OF  
SERBIAN SOCIETY OF EMERGENCY PHYSICIANS

# THE ART OF EMERGENCY

21-23.05.2026  
PIROT, SERBIA

## WELCOME NOTE

It is my great pleasure to welcome you to the 11th International Congress of the Serbian Society of Emergency Physicians, a gathering that continues to grow in relevance, ambition, and global reach. This congress brings together clinicians, researchers, educators, and leaders who share a common mission: to advance the science and practice of emergency medicine, and to strengthen the systems that protect and save lives every day.

Emergency medicine has always stood at the intersection of urgency, complexity, and humanity. In recent years, our field has faced unprecedented challenges—ranging from global health crises and mass-casualty events to the rapid evolution of medical technologies and shifting expectations of modern healthcare systems. These pressures have tested our resilience, but they have also revealed the extraordinary dedication, adaptability, and innovation that define our profession. This congress is an opportunity to reflect on those experiences, to learn from one another, and to shape the future of emergency care with renewed clarity and purpose.

Over the coming days, you will engage with a rich scientific program featuring lectures, panel discussions, hands-on workshops, and presentations from colleagues across Serbia, the region, and the world. The topics span the full spectrum of emergency medicine—from prehospital care and trauma management to resuscitation science, toxicology, disaster preparedness, and the integration of new diagnostic and therapeutic technologies. Each session has been designed to encourage dialogue, challenge assumptions, and inspire practical improvements in clinical practice.

Equally important, this congress provides a space for collaboration and connection. The exchange of ideas, experiences, and perspectives across borders is one of the greatest strengths of our international community. Whether you are a seasoned expert or a young physician at the beginning of your career, your contribution enriches the collective knowledge that drives our specialty forward.

On behalf of the organizing committee, I extend my sincere gratitude to all speakers, partners, and participants whose commitment has made this event possible. Your presence affirms the importance of our shared work and the impact we can achieve together.

I wish you a productive, inspiring, and memorable stay at the 11th International Congress of the Serbian Society of Emergency Physicians. May this gathering strengthen our professional bonds and empower us to continue delivering the highest standard of emergency care to every patient, every day.

Chairmann of the Organizing Comitee  
Vladan Mateović, MD

# 11th INTERNATIONAL CONGRESS THE ART OF EMERGENCY

21-23. MAY 2026, PIROT, SERBIA
