Dear Colleagues

I have been a practicing Physician since 1988 and an ED Consultant since 2000, having completed my training in the North of England. I currently work in a Major Teaching Hospital /. Major Trauma Centre and fulfil a full clinical role which keeps me at the forefront of both clinical and structural changes to EM.

Over the years I have gained experience of chairing committees at multiple levels including 2 years as head of department, which included leading change management and governance of the ED.

I have an active educational portfolio teaching and directing multiple Life Support courses as well as innovating and creating point of care Ultrasound courses

I have been involved with EUSEM for over 20 years, initially helping at precongress courses and in the last decade taking on Ultrasound Section Chair and organising precongress and other EUSEM courses.

I have experience of multiple facets of the EUSEM organisation including being an active examiner with EBEEM, being on the Congress planning group, a reviewer for EuJEM and I have recently taken up the post of Industry Liaison Officer.

My vision for EUSEM over the coming years would be for it to consolidate it's position as the accepted voice of Emergency Medicine in Europe. In this role it needs to continue to support and develop EM as a specialty in all countries in Europe and seek through the collaboration of all it's member societies to drive improvements in the provision of Emergency Care to all

EUSEM will continue it's development as the pre-eminent EM educational resource for European EM doctors and developing research opportunities in EM.

I would be honored to be considered for this position.

Jim Connolly. MBBS. FRCS (Ed) FRCS (Glas). FCEM CFEU. PGCert EmUS
