## Emergency Medicine Day: To plan optimal health services for unplanned care

**Date:** 27 May 10:00 to 11:30 AM CEST

**Objectives:** To discuss how governments should allocate money to improve EM Systems; EM is the gatekeeper and security net of the hospital which is already under a lot of pressure. With COVID the EM services were more stressed and stretched. To be able to provide a better standard of care, we need more human resources, more education and better infrastructure.

What is the EU doing to improve the EM Systems now and after the pandemic?

Let's listen to the patients and learn from their experience.

Preliminary program moderated by Roberta Petrino and Luis Castrillo
